Projects

Classic Majlis Masterpiece

Style: French Neoclassical /
Rococo Influence

Material: Solid timber
construction with
hand-carved detailing

Finish: High-gloss lacquer
with hand-applied gilding

Placement: Custom-scaled
for a Grand Majlis Entrance

Project: The Oak Haven Media Wall

The Vision: To transform a plain living area into a sophisticated lounge by creating a focal point that anchors the room without overpowering it.

The Craft: This floor-to-ceiling installation is crafted from premium veneers, hand-selected for consistent grain patterns. The design features classic raised-panel molding to add depth, contrasted by a contemporary, cantilevered media console. The lower cabinet creates a "floating" effect, engineered with concealed heavy-duty brackets to hold weight while maintaining a light, airy aesthetic.

The Result: A seamless marriage of technology and tradition, where the warmth of natural timber softens the presence of modern electronics.

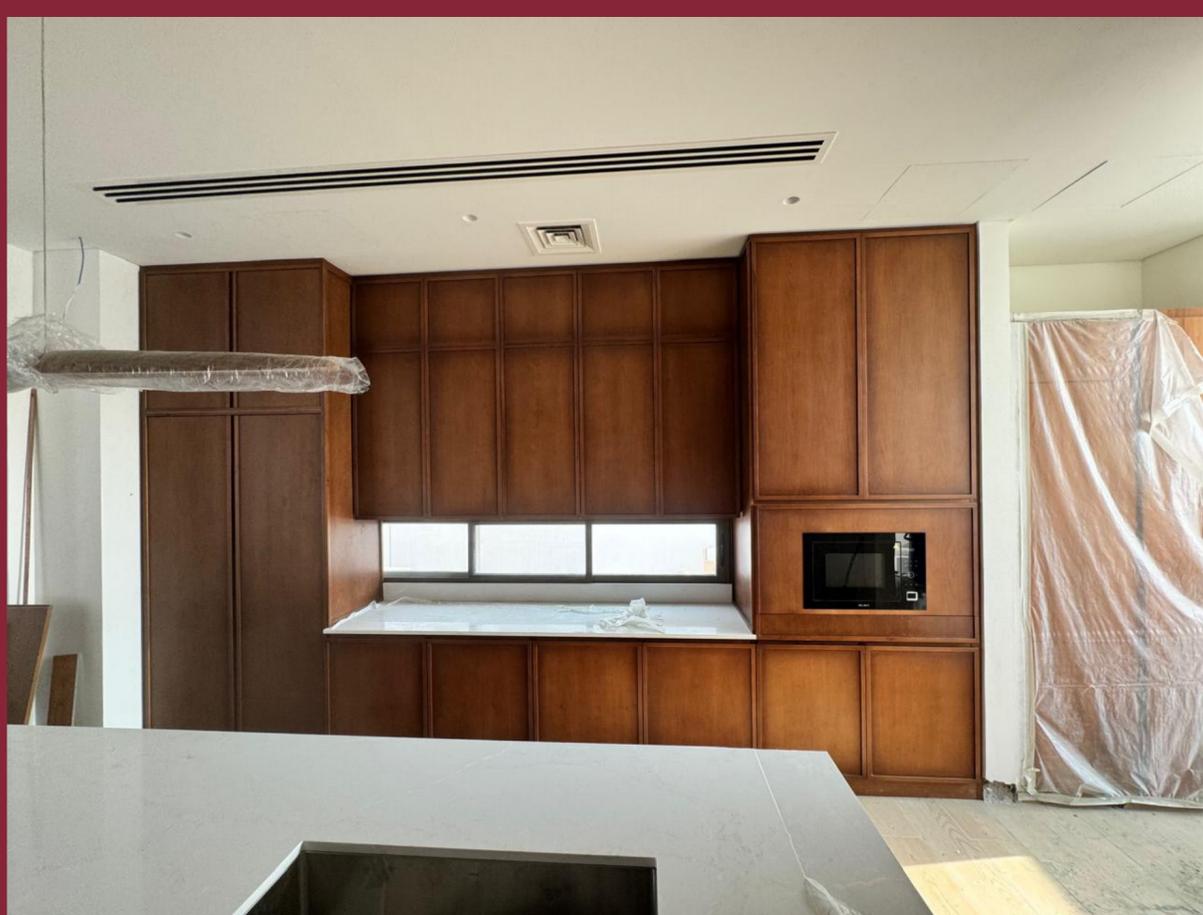

The Vision: Sophisticated Utility In modern UAE living, the kitchen is more than a workspace; it is a social hub. For this project, the objective was to create a high-performance environment that maintains a minimalist, furniture-like appearance.

Kitchens

The Craft: Precision and Durability The lower cabinetry and central island are finished in a veneer, selected for its resilience and rich vertical grain. Upper units are finished in a seamless matte lacquer, creating a sense of lightness and height. Every drawer and door is fitted with premium soft-close hardware.

The Vision: Grand Utility Designed for a residence that values both culinary excellence and social gathering, this project transforms a high-traffic area into a commanding architectural statement. The objective was to provide floor-to-ceiling storage and vast preparation surfaces while maintaining a sophisticated, uncluttered aesthetic for a "distinguished client" in the UAE.

Kitchen Culinary Hub

The Result: An Exceptional Culinary Experience By integrating premium appliances directly into the woodwork and pairing the dark timber with crisp white countertops, we achieved an "exceptional level of quality" that is both durable and timeless. The kitchen functions as a complete lifestyle solution, offering ample room for professional-grade preparation and intimate family dining.

The Curated Library Suite

The Result: An Atmosphere of Distinction The result is a commanding architectural feature that defines the room. By balancing the dark wood tones with warm illumination, we created a space that feels both grand and inviting—a perfect showcase for a distinguished client's most valued collections.

floor-to-ceiling storage solutions

The Result: Seamless Integration True to our commitment to precision craftsmanship, every unit is custom-fitted to the room's unique dimensions, including specialized venting for integrated climate control. The result is a seamless, built-in look that provides an exceptional level of organization and quality for the modern lifestyle.

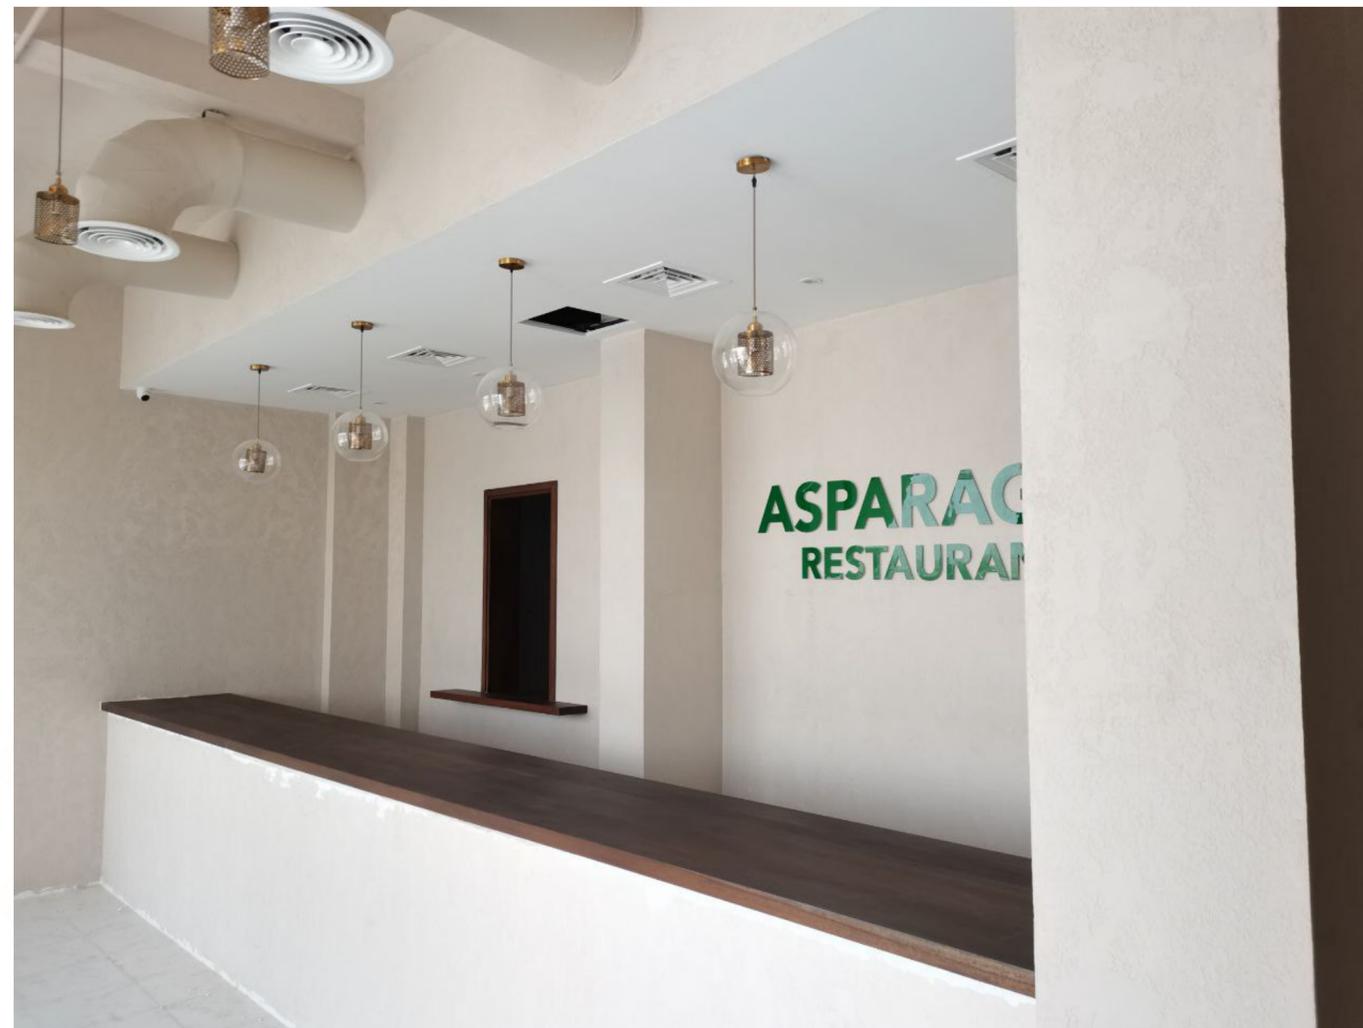

The Craft: Intricacy in Timber These portals demonstrate our commitment to precision craftsmanship. One design features an exquisite "mashrabiya-style" fretwork center and sidelights, allowing a play of light and shadow while maintaining privacy. The second design focuses on classical relief carving, featuring hand-finished medallions and floral rosettes that showcase the depth and richness of a high-grade wood.

The Result: Timeless Durability By combining traditional joinery with modern weather-sealing and reinforcement, we ensure that these entrances remain as functional as they are beautiful. Each piece is treated with specialized, UV-resistant finishes to preserve the natural luster of the wood against the local climate, delivering an exceptional level of quality that lasts for generations.

The Craft: Merging Form and Utility The centerpiece is a sprawling, multi-tiered service counter finished in a rich, dark timber veneer. To ensure excellence in quality, we utilized high-pressure laminates and solid edge-banding to withstand the rigors of daily restaurant operations. The back-of-house cabinetry was custom-engineered with a seamless handle-less design, providing ample storage for POS systems and service essentials while maintaining a clean, architectural silhouette.

The Result: Brand Alignment through Design By coordinating the timber tones with the restaurant's branding and lighting, we created a cohesive atmosphere that feels both professional and inviting. This project proves our commitment to delivering meticulous design for institutions that seek an exceptional level of quality for their clientele.

Furniture: Extra-length banquet table with hand-painted/inlaid top and hand-carved cabriole legs.

Seating: Custom-designed high-back chairs with premium upholstery and button-tufted detailing.

Wall Treatments: Full-height architectural paneling with integrated geometric mirrored sections.

Artistry: Bespoke ceiling medallions and crown moldings coordinated with the furniture's decorative motifs.

Wall Paneling: Precision-milled solid wood slats with a hand-rubbed oil finish.

Integrated Lighting: Recessed, low-profile 3000K LED strips with a staggered architectural layout.

Decor

Cabinetry: High-grade lacquer finish with a cantilevered, handle-less design and soft-close internal hardware.

Functionality: Designed as a multi-purpose entryway or hallway feature to provide ambient lighting and concealed storage.

Design Style: Scandinavian Modernism / Contemporary Minimalist.

Primary Material: Wood panels with a matte, protective natural-grain finish.

Joinery: Precision-mitered waterfall edge and structural wall-anchoring system.

Integration: Coordinated floor-to-ceiling wall paneling for a monolithic look.

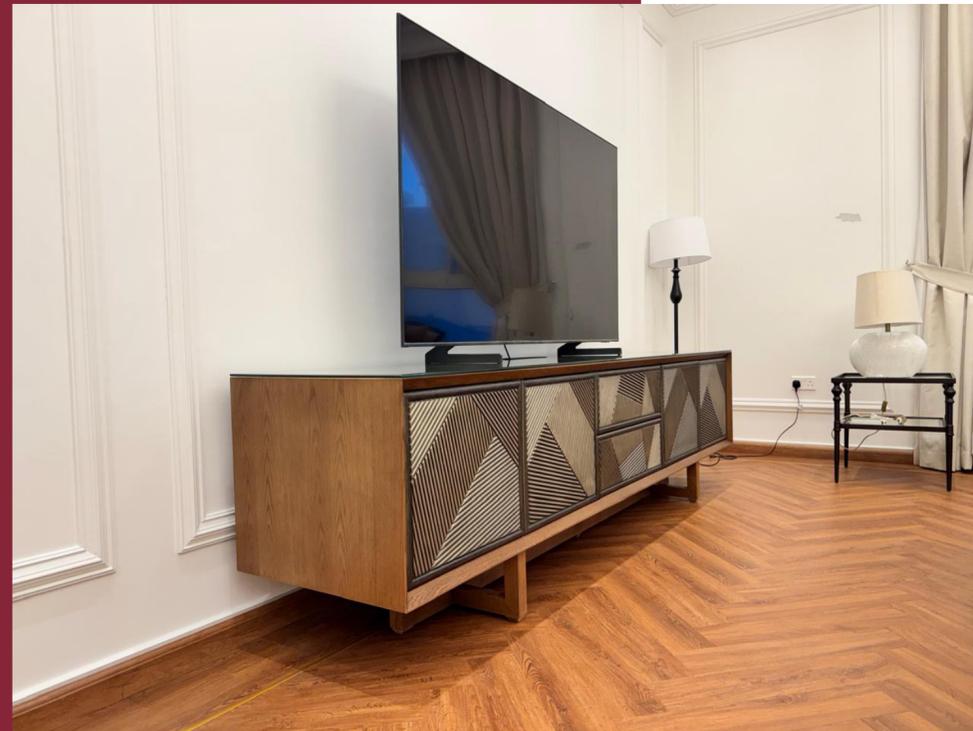

Reception Desk: Bespoke curved fabrication with integrated cable management and a high-durability matte lacquer finish.

Salon Reception

The Vision: Organic Serenity For this high-end salon, the objective was to move away from rigid geometry and embrace fluid, organic forms that evoke a sense of calm and rejuvenation. The entrance serves as a sanctuary-like introduction to the guest experience, designed for "distinguished clients" who value an "exceptional level of quality".

The Result: Immersive Branding By pairing these custom-fabricated elements with delicate, petal-like pendant lighting, we created a cohesive environment that is both modern and welcoming. The installation demonstrates our "Customer First" philosophy, providing a functional workspace for staff while offering a breathtaking first impression for every visitor.

The Result: Functional Luxury Delivering an Excellence in Quality, the console features a seamless, mitred-edge frame and a recessed pedestal base that gives the substantial piece a light, floating appearance.
